Microparticle Analysis with ParticleScout and Raman Microscopy

- **fast**
  - Measure up to 1000 particles per hour

- **automated**
  - High throughput
  - High reproducibility

- **specific**
  - Easy and fast particle characterization

- **precise**
  - Target 1 µm particles

- **sensitive**
  - Compatible with aqueous samples
  - Specialized substrates not required

- **conclusive**
  - Individual report generation

- **reliable**
  - Particle identification with integrated Raman database software
  - Analyze thousands of spectra per minute

ParticleScout is...
